## DEVELOPMENT PRICE LIST

### • PRE-LAYOUT ENGINEERING

Mail your proprietary drawings and specifications for a free, confidential analysis and quotation. Prelayout engineering changes typically range from \$500 to \$2000, depending on circuit complexity.

### • LAYOUT AND PROTOTYPE PARTS

50 fully functional prototype circuits in 6 to 12 weeks.

### • PRODUCTION TEST HARDWARE

\$1200 to \$2000, depending on circuit complexity.

### • TERMS ..... All development charges must be prepaid with order.

## DOCTOR CMOS Prescription for Profits

- Fast design cycle
- Low development cost
- Low power
- 3volts to 15volts
- Standard Metal Gate Process
- Low production prices

HAVE A NICE DAY ☺

# MASTER LOGIC PRODUCTION PRICE LIST

## MASTER LOGIC — 50 ..... Plastic DIP Package

	14, 16, 18 pin	20, 22, 24 pin
First 1,000 pieces	\$3.50	\$ 4.50
Next 4,000 pieces	3.25	4.25
Next 10,000 pieces	3.00	4.00
Next 15,000 pieces	2.75	3.75
Additional pieces	2.50	3.50

## MASTER LOGIC — 75 ..... Plastic DIP Package

	14, 16, 18 pin	20, 22, 24 pin
First 1,000 pieces	\$6.50	\$ 9.50
Next 4,000 pieces	5.40	7.75
Next 10,000 pieces	4.70	6.00
Next 15,000 pieces	4.20	5.40
Additional pieces	3.90	4.90

## MASTER LOGIC — 100 ..... Plastic DIP Package

	14, 16, 18 pin	22, 24, 28 pin
First 1,000 pieces	\$10.25	\$12.25
Next 4,000 pieces	8.15	10.15
Next 10,000 pieces	6.10	8.10
Next 15,000 pieces	5.90	7.90
Additional pieces	5.70	7.70

## MASTER LOGIC — 150 ..... Plastic DIP Package

	14, 16, 18 pin	22, 24, 28 pin	40 pin
First 1,000 pieces	\$11.25	\$13.60	\$15.60
Next 4,000 pieces	9.55	11.50	13.50
Next 15,000 pieces	8.25	10.20	12.20
Additional pieces	6.80	8.80	10.80

## MASTER LOGIC — 200 ..... Plastic DIP Package

	14, 16, 18 pin	22, 24, 28 pin	40 pin
First 500 pieces	\$13.00	\$15.00	\$17.00
Next 4,500 pieces	11.05	13.05	15.50
Next 10,000 pieces	9.55	11.55	13.50
Additional pieces	7.55	9.55	12.25

# MASTER LOGIC

Master LOGIC®: an improved family of CMOS masterslice circuits specifically developed for applications where speed and reliability are critical.

- Twice the speed of existing CMOS masterslice products.
- Better on-chip power distribution.
- Higher noise rejection.
- Fast design cycle.
- Low tooling charge.
- Proven metal-gate CMOS processing.

And of course we offer complete second-source capability for all present and future MasterMOS\* products and services.
